

# **TOMATO SALSA IS BACK.**

**We have resumed serving our fresh mild tomato salsa in some of our restaurants and expect to be serving it in all of our restaurants soon.**

**The tomatoes are grown in the United States and come from safe sources approved by the Food and Drug Administration.**

**While Chipotle did not have any issues with our tomatoes, we did voluntarily remove our tomatoes last week for your protection when there was an indication of a problem with the tomato supply.**

**Thank you for your patience, and we hope to see you soon in our restaurants.**
